VERTICAL P-BASE MOTORS

Toshiba's Vertical P-Base motor series is designed with the petrochemical and material processing industries in mind. This product line is built to withstand the toughest conditions and offers some of the highest efficiency and torque ratings — leading to a longer life and greater reliability.

In addition, our LP design meets API 610 specifications for chemical processing applications and all motors include a patent-pending lubrication system that provides improved flow and circulation of grease and oil for longer bearing life.

The Vertical P-Base motor can be used in indoor and outdoor applications, exceeds NEMA MG1 Part 31 requirements, and is available in standard and premium efficiencies.
