

LOW VOLTAGE MOTORS & DRIVES GROUP

# NOW DIVISION 2 CERTIFIED

Toshiba EQP Global SD, 840, and 841 motors are now CSA certified for Division 2 hazardous locations on sinewave and PWM power sources. The Division 2 certification is ideal for installations where hazardous material is present and may affect motor operation. Application examples include mining, oil, and gas exploration.

The hazardous classifications table found in the catalog appendix will define the temperature codes and speed ranges for sinewave and ASD operation. Learn more by contacting a Toshiba Motors sales representative or visit:
