Efficiency, Quality, & Performance (EQP) — The EQP Global® Close-Coupled Pump is Toshiba’s next-generation NEMA Premium® efficiency motor series.

This cutting-edge motor product line is designed to meet or exceed the competitive demands of the global fluid handling industry, as well as the requirements of the Energy Independence & Security Act of 2007 (EISA), while maintaining the high reliability and quality expected from Toshiba.

The EQP Global Close-Coupled Pump motor series is designed for close-coupled pumping applications. Building on over 20 years of success with our EQP III motor series, the EQP Global Close-Coupled Pump motor features multiple new design enhancements that make it one of the lowest cost-of-ownership products in the industry.

Our EQP philosophy extends beyond great products. We provide solutions and Global Supply Chain Management Systems (GSCMS) to meet the evolving needs of our global customers.
